Jon Cowie and Luca Moranzoni are GDC registered specialists in endodontics who share a passion for clinical excellence, innovation and education. They work in a specialist referral practice in Bath, UK, also having experience across general practice and hospital settings, giving them a strong understanding of the challenges within different clinical environments. Jon completed his specialist training at King's College London, while Luca trained at the Eastman Dental Institute.

Their clinical philosophy centers around contemporary, restoratively driven endodontics - preserving natural tooth structure where necessary and ensuring long-term functional outcomes.

The roots of Contemporary Endodontics originate in 2015, and through a combination of hands-on courses and workshops they have trained thousands of dentists. Their expertise in digital-based workflow, patient centered treatments and restoratively-driven endodontics has seen them lecture both nationally and internationally. They have contributed to undergraduate and post-graduate training at Bristol Dental Hospital, King's College London and the Eastman Dental Institute. They are also actively involved in training new dentists in the South West of England and continue to deliver hands-on courses in endodontic clinical workflows.

"Our vision is to distill our years of clinical practice and education to create bespoke courses relevant to your day-to-day clinical practice."

ADVANCED CONTEMPORARY ENDODONTICS

COURSE DESCRIPTION

'Endodontic Problem Solving and Endodontic Retreatment'

This program is aimed at the clinician looking to refine real-life specific clinical skills, solve common endodontic challenges, and build a better practice-based workflow.

WHY CHOOSE US?

- Small group learning, honest, unbiased and with a modern approach
- We run the courses in our working clinic with access to see what we do, how we set up our surgery and how you can translate that directly to yours
- Enjoy close supervision with 2 specialist endodontists
- This small class size ensures time can be spent to specific delegate needs within the framework of the course
- Zeiss microscopes available to use

WHAT WE COVER

- The 'practice walk-through' - we open our doors and show you our referral process, our clinic set-up, our microscope and camera set-up
- We walk you through 'the consultation appointment' showcasing our workflow in an interactive session
- Watch us undertake aspects of a simulated treatment - this workshop is focused on giving you the concepts of how we do fast, efficient yet high level endo
- Endodontic retreatment decision making - delivered in an interactive case-based seminar
- How to use TruAnatomy and its advantages for curved and long canals - a dentine preservation file system with hands-on
- How to manage the calcified (narrow) and ledged canals - protocols and hands-on
- How to manage s-shape curvature with hands-on
- How to use Reciproc, Reciproc Blue and XP Shaper Rise for retreatment cases - hands-on
- How to remove gutta-percha with rotary instruments - hands-on
- How to remove Thermafil - hands on
- How to remove a metal post - hands-on
- Open apex management with a collagen barrier technique and hydraulic putty - hands-on

Course Fee: £1650+ Vat

Location: Circus Dental, 13 Circus, Bath, BA1 2ES

ADVANCED CONTEMPORARY ENDODONTICS

SAMPLE COURSE TIMETABLE

DAY 1

9:00am–5:30pm

- 09.00** Introduction
- 09.15** Introduction to TruNatomy – prepare a 3D printed tooth block
- 10.00** Introduction to Reciproc – prepare a 3D printed tooth block

- 10.45** *Break*

- 11.00** Calcified teeth – explanation and hands-on
- 12.00** Ledged block – explanation and hands-on

- 13.00** *Lunch*

- 14.00** ‘S’ shaped canal – explanation and hands-on
- 15.00** Additional time to complete any of the hands-on exercises

- 15.30** *Break*

- 15.45** Open apex – central incisor hands-on
- 17.00** Recap

DAY 2

9:00am–4:30pm

- 09.00** Start, recap
- 09.30** Retreatment seminar and perforations lecture

- 10.30** *Break*

- 10:45** GP removal, Thermafil removal and post removal

- 13.00** *Lunch*

- 14.00** Clinical workflow with demo

- 15.30** *Break*

- 15.45** Catch up and recap

“Timings and subjects may vary, and will be specified prior to the course when advertised.”
