Jon Cowie and Luca Moranzoni are GDC registered specialists in endodontics who share a passion for clinical excellence, innovation and education. They work in a specialist referral practice in Bath, UK, also having experience across general practice and hospital settings, giving them a strong understanding of the challenges within different clinical environments. Jon completed his specialist training at King's College London, while Luca trained at the Eastman Dental Institute.

Their clinical philosophy centers around contemporary, restoratively driven endodontics - preserving natural tooth structure where necessary and ensuring long-term functional outcomes.

The roots of Contemporary Endodontics originate in 2015, and through a combination of hands-on courses and workshops they have trained thousands of dentists. Their expertise in digital-based workflow, patient centered treatments and restoratively-driven endodontics has seen them lecture both nationally and internationally. They have contributed to undergraduate and post-graduate training at Bristol Dental Hospital, King's College London and the Eastman Dental Institute. They are also actively involved in training new dentists in the South West of England and continue to deliver hands-on courses in endodontic clinical workflows.

"Our vision is to distill our years of clinical practice and education to create bespoke courses relevant to your day-to-day clinical practice."

THE COMPLETE OBTURATION COURSE

COURSE DESCRIPTION

'Intensive 2 Days Hands-on'

In depth, heavily hands-on course with warm vertical obturation techniques. This course gives you the ability to develop the techniques to tackle complex and varied obturation scenarios (see below). The theory will be delivered online, at your own pace, to maximise hands-on time in person.

WHY CHOOSE US?

- The focus is to up-skill in specifically challenging obturation scenarios with hands-on practicals
- Complimentary access to our online platform to view the theory and presentations relevant to the course-WHY? To maximise the hands-on time in person over the two days. Obturation is a practical skill often overlooked on courses.
- Enjoy close supervision with 2 specialist endodontists in a small group - honest, unbiased and with a modern approach
- This small class size ensures time can be spent to specific delegate needs within the framework of the course
- Zeiss microscopes available to use

WHAT WE COVER

- Access to Contemporaryendo.com as part of the course to view the theoretical content prior to the hands-on. Theory and hands-on videos available to view at home, in your own time and at your preferred pace.
- Cold Lateral Compaction - Finesse the basics, a much needed skill for some tougher cases
- Warm Vertical Compaction - Standard protocol
- Warm Vertical Compaction - The oval shaped canal
- Warm Vertical Compaction of 'The big but not so big apex' - A hybridised technique on a central incisor with an apical size 50-60
- Warm Vertical Compaction of an internal resorption defect
- Prepare and obturate two joining canals - confluent canals in a lower incisor
- Prepare and obturate a tooth where canals bifurcate - such as a premolar
- Obturation of the open apex - MTA/bioceramic putty
- Obturating a lower molar with a perforation - the full monty, warm vertical and simultaneous perforation repair
- The final scenario - Warm vertical compaction and bioceramic putty/MTA repair of an internal/external resorptive defect

Course Fee: £1650+ Vat

Location: Circus Dental, 13 Circus, Bath, BA1 2ES

THE COMPLETE OBTURATION COURSE

SAMPLE COURSE TIMETABLE

DAY 1

9:00am-5:30pm

- 09.00** Intro
- 09.30** Cold lateral compaction
- 10.15** Warm vertical compaction

- 11.00** *Break*

- 11.15** Warm vertical compaction, windscreen
- 11.45** Warm vertical compaction, hybridised
- 12.15** Internal resorption tooth 1

- 13.00** *Lunch*

- 14.00** Internal resorption tooth 2
- 14.45** Confluent canals, preparation and obturation - lower incisor

- 15.45** *Break*

- 16.00** Bifurcating canals, preparation and obturation - lower premolar

DAY 2

9:00am-4:30pm

- 09.00** Start, recap
- 09.30** Lower molar perforation repair with lecture
- 10.30** Open apex - central incisor

- 11.30** *Break*

- 11.45** Incisor access and repair

- 13.00** *Lunch*

- 14.00** Clinical demo

- 15.30** *Break*

- 15.45** Choice of other scenarios

"Timings and subjects may vary, and will be specified prior to the course when advertised."
